Did you know, September is National Infant Mortality Awareness Month?

According to the National Healthy Start Association, infant mortality is when a baby dies before its first birthday. The five leading causes of infant death are birth defects, preterm birth and low birth weight, sudden infant death syndrome (SIDS), maternal pregnancy complications and injuries (e.g., suffocation).

It's important to educate yourself and improve your understanding of safe sleep and SIDS. Sign up for Bellies, Babies, and Beyond's W.I.S.E and E.A.M.I 6-week seminar classes to learn about the importance of practicing safe sleep techniques!
