## **DOH and DOH-Orange Response to Orlando Tragedy:**

The State ESF-8 personnel activated and operated from the State Emergency Operations Center (EOC). Per request from the Orlando EOC, the Florida Emergency Mortuary Operations Response System (FEMORS) activated to support fatality management by the District 9 Medical Examiner; and within a few hours, they were on site.

DOH-Orange Emergency Operations Staff worked at the Family Resource Center located at Camping World Stadium alongside local, state, federal and community agencies to address the needs and provide information, support and resources to those directly affected. This included vital records for free death certificates, preparedness staff and coordination, clergy roster support activities, EH food service inspections, among others.
