

RADIATION RESPONSE VOLUNTEER CORPS TRAINING

The Central Florida MRC is sponsored a one-day Radiation Response Volunteers Corps (RRVC) training in Orlando, FL for those professionals who are interested to volunteer to assist with population monitoring following a large scale radiological event, such as the detonation of a “dirty” bomb.

MOULAGE TRAIN-THE-TRAINER COURSE

Teams trained to provide moulage in disaster exercises for realism and safety considerations in mass casualty and pandemic/WMD scenarios.

5K WALKS

Volunteers participated at the 8th Annual 5K Walk and Health Fair and Gatorland 5K adventure run during April and October 2014. The Central FL MRC Unit supported the First Aid Station and manned booth at the Health fair. Hands on training for deployment of MRC cache setup tents, and first aid station operations.

RELAY FOR LIFE EVENT

Support the First Aid Station

Volunteers participated at the "Relay for Life -Hunters Creek" Event with DOH-Orange and the American Cancer Association. Our mission was to provide BLS and support the first aid station throughout the event. This was a 24 hour event and the attendance was of 5, 000 throughout the event.

AIR SHOW

Established field hospital-medical surge training

The MRC Unit supported the SMRT5 at the Field Medical Hospital for 3 days to afford triage, first aid and a disaster collection point in the event of a major air crash during the airshow. Volunteers were seamlessly integrated into the operation to provide communications, logistics and clinical support. This operational event provides real time, hands on familiarization and training for medical surge (alternate medical treatment site-AMTS) response.
