REPORTED AIDS CASES*

JANUARY-MARCH 2016

*Current HIV Infection data by year of report reflects any case meeting the CDC definition of 'HIV infection' which includes all newly reported HIV cases and newly reported AIDS cases with no previous report of HIV in Florida. If a case is later identified as being previously diagnosed and reported from another state, the case will no longer be reflected as a Florida case and the data will be adjusted accordingly. Data from the most recent calendar year (2015) are considered provisional and therefore should not be used to confirm or rule out an increase in newly reported cases in Florida. The final year-end numbers are generated in July of the following year, after duplicate cases are removed from the dataset, as is customary of HIV surveillance in the US.

CUMULATIVE DATA THROUGH DECEMBER 31, 2015*

* Please note that vital status data in this table is calculated differently than for the tables that follow. Living data on the next pages are calculated based on current age whereas the table above is calculated based on age at diagnosis therefore, there is a small difference between the two because a small number were children <13yrs at diagnosis whose current age makes them adults.

*Please note with greater than 50% of the AIDS cases are dead more relevant date to program planning are found within the living data tables.

*Acronyms: MSM=men who have sex with men, IDU=needle-use, other=received HIV-contaminated blood products or tissue, Hetero=sex with HIV+ person of opposite sex, Perinatal=persons with a blood exposure as a child or perinatal transmission, NIR=no identified risk.

* Data on persons living with HIV disease and AIDS best represents the demographic make-up of persons in need of care in the community. These data are most useful for program planning for both prevention and patient care purposes.

*Data in all tables calculated based on current age
Florida Law (s384.25, F.S.) requires cases for AIDS reported by anyone who diagnoses or treats a person with AIDS. A person who test positive of Human Immunodeficiency Virus (HIV) on or after July 1, 1997 is also reportable. 

Note: There is a $500 fine per case for failure to report.

Confidentiality is strictly enforced and guaranteed. Please comply with all information security and mailing protocols.

To report a case please contact one of the following:
